Summary

I am shahadat.i am a junior full-stack developer.recently i have finished more than a few projects or many projects on javascript and react.js. And I can make perfect responsive website design with css,bootstrap4,material ui, flexbox, and grid layout.i also have solid knowledge working with node.js,express.js mongodb,firebase, and heroku.now i am learning redux ,and typescript.

Programming knowledge

➢ **Expertise :** HTML5**,** CSS3, Bootstrap4**,** Javascript, ES6, React.js, Material ui. ➢ **Comfortable :** Node.js, ,Mongodb, Express.js,

➢ **Learning :** Redux.js, MYSQL and TypeScript.

➢ **Tools :** Vs code, git and github, create react app, npm**,** Netlify,firebase-hosting.

My Projects

Creative Agency: Website ǁ github(client side) ǁ github(server side)

- A full-stack single-page web app with admin panel and clients.
- Clients can order service,add review,and also show his/her all order list.
- Admin can see all service lists,add a new service,and delete service
- Admin can add a new/staff member.

Technology used : React.js,firebase authentication,css,bootstrap,react-bootstrap,mongodb,heroku node.js

Red Onion : Website ǁ github

- Showed different different types of food items on the home page by selecting.
- Food Ordering Systems are dynamically managed.
- Displayed Cart Added Products Length at Cart icon in Navbar.
- Authentication System (Google) is managed with firebase.
- Used Private Router for Shipment Component.
- Tried to dynamically manage event handling keeping UX in mind.

Technology Used : React.js, Firebase-Authentication,Bootstrap4,Material ui,React bootstrap,React hook from,Heroku.Node.js,Firebase-Hosting.

Apartment Hunt : (Team Project) Website ‖ github(client side) ‖ github(server side)

- A full stack single page web application with a dashboard
- User can see the providing house and house details
- Admin can see all booking list and add new Rent
- Admin can also update a booking status
- Also it has authentication system where user can create new account and
- login with google, Facebook

Technology used:
React, NodeJS,ExpressJS,MongoDB,Bootstrap,React-Bootstrap,Material UI,Firebase Authentication,Heroku.Firebase-hosting

Travel-guro : Website ‖ github

- This is a single and responsive traveling web application.
- Here, you can choose their favorite place and also select their origin or home.
- After booking, you can see the available hotel and hotel description for the selected place.
- Also, you can search for your favorite place in google map on this site.
- I have used firebase-authentication for the login page on this website.

Technology used : React.js, Firebase-Authentication,Bootstrap4,Material ui,React-bootstrap,Firebase-Hosting.

My Blog:
- ❖ **Fundamental-concepts-of-JavaScript (part 1)**
- ❖ **Fundamental-concepts-of-JavaScript (part 2)**
- ❖ **Fundamental-concepts-of-JavaScript (part 3)**

Academic Qualification :
Student : Alim (**Intermediate**) (2020 - 2021)

Madrasah : Al-amin Bariha Kamil Model Madrasah

Location : Chandgown,Bahir signal,Chittagong,Bangladesh

Online Course :
➢ Bangla complete web development course by programming hero

Language Competency:
Bangla : Fluent in Bangla

English : Familiar working knowledge in English.
