Summary

I am shahadat hossain.I am not a CSE background student, I am a Madrasah background student.I am a **fresher** front-end web developer.Recently I have finished more than a few projects or many projects on javascript and react.js. And I can make perfect responsive website design with css, bootstrap4, material ui, flexbox, and grid layout.I also have solid knowledge working with node.js,express.js mongodb,firebase, and heroku.now i am ready and excited for learn redux and next.js

Programming knowledge

- ➢ **Expertise :** React.js , JavaScript , ES6 , Material Ui , Bootstrap 4 ,CSS3,
- ➢ **Comfortable :** C , Node.js , Express.js , MongoDB , Stripe , Firebase
- ➢ **Learning :** Redux.js , Next.js ,
- ➢ **Tools :** Vs Code , Git and Github , Netlify , Heroku , Firebase Hosting .

My Projects :

Creative Agency: Website ‖ Github(client side) ‖ github(server side)

- ❖ A full-stack single-page web app with admin panel and clients.
- ❖ Clients can order service,add reviews,and also show his/her all order list.
- ❖ Admin can see all service lists,add a new service,and delete service
- ❖ Admin can add a new/staff member.

Technology used :

React.js, Firebase authentication,css,bootstrap,react-bootstrap,mongodb,heroku node.js

Red Onion : Website ‖ Github

- ❖ Showed different types of food items on the home page by selecting.
- ❖ Food Ordering Systems are dynamically managed.
- ❖ Displayed Cart Added Products Length at Cart icon in Navbar/
- ❖ The Authentication System (Google) is managed with firebase.
- ❖ Used Private Router for Shipment Components.
- ❖ Tried to dynamically manage event handling keeping UX in mind.

Technology Used :

React.js, Firebase-Authentication,Bootstrap4,Material ui,React bootstrap,React hook from,Heroku.Node.js,Firebase-Hosting.

BD-Express : [Website](#) ll [Github](#)

- ❖ This is a E=Commerce website.
- ❖ I have created three types of products here.First of all, I have created some different types of products. Then laptops and mobiles.
- ❖ This web site has search box options. So that a user can search for the product of his choice in a very short time.
- ❖ If the user wants to know the details about the product, he has to click on the More Details button.
- ❖ You can add products by clicking on add to cart.
- ❖ If you want to see the added product, you have to go to the navbar and click on the order item.And clicking the order item will take him to a login page.Then if the user is logged in, he will be able to see the product he has ordered.
- ❖ Finally, if he wants to buy his orders, he has to click on the pay with card, and to give his details information. then he can pay with the card number.finally he can see the successful message.

Technology used:
React, NodeJS,Express.js , Bootstrap , Firebase , JavaScript , Stripe.

Academic Qualification :

Student : Alim examinee (**Intermediate**) (2020 - 2021)

Madrasah : Al-amin Bariha Kamil Model Madrasah

Location : Chandgown,Bahir signal,Chittagong,Bangladesh.

Online Course :

- ➢ Bangla complete web development course by programming

Language Competency:

Bangla : Fluent in Bangla.

English : Familiar working knowledge in English.
